

Technical Data

Microflow 120 Release Agent

General :

Microflow 120 is a powerful release agent for high temperature polymers such as ABS, Polycarbonat, HDPE, PP and Polyamides.

Microflow 120 is suitable for transparent parts and will not cloud the transparency..

| | |
|-------------------|---------------|
| Melt temperature | 135 – 145 ° C |
| Colour | White |
| Odor | Creamy |
| Dosing | 0,5 – 1,0 % |
| Flash Point | > 300 ° C |
| Thermal Stability | > 290 ° C |

The doses indicated are recommendations based on experience. The optimum dose for each individual case of application should be determined in practical trials. All information given herein is only a recommendation. Its use shall remain the sole responsibility of the customer.
